

## **STATEMENT OF PURPOSE**

### **RS20734**

This legislation provides more flexibility to school districts in coping with reduced budgets. First, it provides another year of relief in FY12 from the requirement that school districts allocate a certain amount of funding for school building maintenance. This relief was also provided in FY10 and FY11. Second, the bill makes technical corrections that will allow school districts to continue requesting that their local voters convert existing plant facility levies into supplemental levies in any year in which the state reduces K-12 funding.

## **FISCAL NOTE**

No fiscal impact to the state. School districts will be given additional tools to help in managing reduced budgets.
